

## Fireworks Display Safety Document

---

### Safety Overview

- Always be aware of everyone and everything around you
- Move in a quick but safe manner
- Listen and Watch each other and the Shooter
- If you have a problem let someone know about it
- You are not allowed in the shooting area without proper clothing \*  
\*(long pants, long sleeved shirt, shoes or boots, hat, hearing/eye protection)

### Loaders and Lid Tenders

1. Always keep the lid on your storage can !! (#1 Rule)
2. Remove the lid with your back to the firing line, protect the shells inside
3. Remove the lid quickly, grab your shells, then replace the lid quickly
4. Remove only the number of shells as mortars you are assigned
5. Hold the shells close to your body as you carry them to the mortars
6. Reload your mortars when the shooter is at least 5 mortars past you
7. You are responsible to watch and make sure your shells fire
8. See section below for "Misfire Instructions" \*

### Misfire Instructions \*

1. If a shell fails to fire Do Not Load another shell into that mortar
2. Mark the mortar so you remember which mortar not to reload
3. Let the Shooter know about that mortar

### Show Tempo

It is very important to keep the show moving. Breaks in the show will ruin a fireworks display and can be avoided if you hustle and make sure your mortars are always loaded. **Do Not make the shooter wait for you to load your mortars!**

This display is designed so a shell is fired every 2.8 seconds and the show moves along at a very rapid pace, so there is no time to rest. You need to move quickly and safely, while at the same time being aware of everything going on around you.

Be Safe and have Fun !!
